

# We are the company that started it all

AQUAVISION pioneered waterproof displays for both indoor and outdoor environments, developing the world's first truly waterproof television in 1997.

Today, the AQUAVISION name is synonymous with premium, IP-rated screens. Our products are the de facto choice for upscale residential, commercial, hospitality, and marine settings. The AQUAVISION range includes on-wall, in-wall, mirror, outdoor, and specialist marine displays, with screen sizes up to 100". Seamless integration with leading control systems, including Control4, Crestron, AMX, Savant, and RTI - comes as standard. Technologically advanced and aesthetically refined, our products are sold globally and feature in high-profile installations from London to Dubai and beyond.

Now part of the LUMAVOX Group, AQUAVISION is headquartered in Lanark, Scotland, with a dedicated R&D and manufacturing facility in Livingston, near Edinburgh.

## Luxury Technology. Engineered for Every Environment.

Experience a new dimension of home and commercial entertainment with our collection of waterproof displays, meticulously designed for elegant living spaces, wellness suites, outdoor areas, and marine environments. Blending aesthetics with durability, each display is crafted to perform flawlessly in the most demanding conditions.

# Frameless Style

## Frameless

This design utilises a slimline galvanised steel metal box that fits flush into the wall with a polished edge glass fitting tight on to the wall surface, protruding by only 6mm.

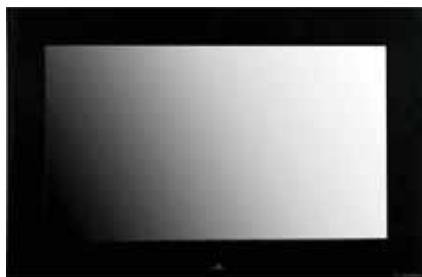

## Installation

# Glass Styles

## Glass Options

All our glass is printed in our UK factory by a team of specialist technicians on a 1200dpi CMYK digital glass printer to ensure perfect precision and quality.

### Black

Multiple layers of black ink digitally printed onto low-iron, optically clear glass to give the sharpest black, and the clearest picture quality.

### White

A low iron, optically clear glass printed white with a thin black border surrounding the viewing area to enhance picture contrast and quality.

### MirrorVision PLUS®

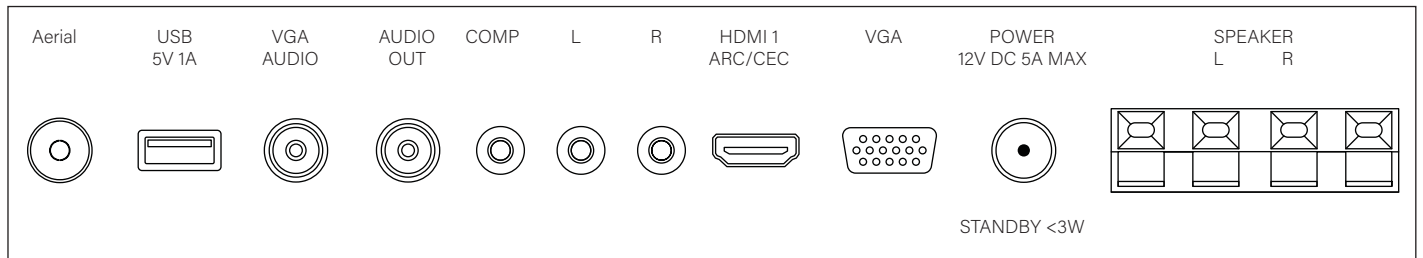

Sometimes the standard is the best for a project. MirrorVision Plus is as near to a standard mirror as possible, while still hiding the television when it's not in use.

As the tried, trusted, and the industry standard, Aquavision's MirrorVision Plus is as functional as it is decorative.

Adding brightness, depth, or openness to a room, MirrorVision Plus of any shape or size is a welcomed addition to any space. Completely colour neutral, clear mirror fits in any design scheme with any colour pallet.

## Genesis - (2K 1080p Resolution)

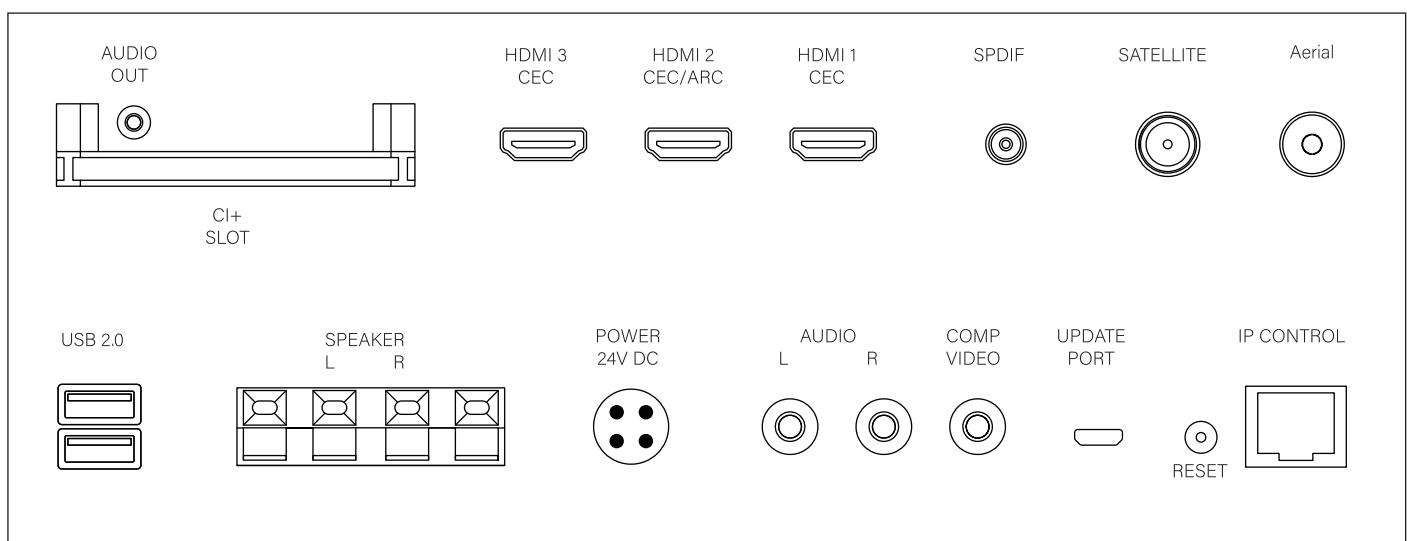

The first choice for stand alone television projects. With a single HDMI Input, IR control, Digital FreeView HD tuner as standard, together with built in audio amplifier, audio out. Supplied complete with power supply and waterproof remote control.

## Pinnacle - (4K 2160p Resolution)

The Pinnacle is our first choice for system integrations and custom installers who want a complete 4k offering. Pinnacle offers 3 x HDMI, DVB-T2/S2/C tuners, Audio out and digital coax out, full CI+ module, IR and IP Control, as well as a built in 8W RMS per channel amplifier. HDCP 2.2 compliant.

When the Pinnacle is supplied with "High Bright" screens, you can also specify an "Auto Brightness" feature. For further details on this please page 28.

# Specialist Displays

## Bespoke Mirror Displays

The Bespoke Range is our most popular choice for architects, designers & clients wanting more than just a Television. Aquavision offers a unique custom mirror service and can manufacture to individual specification, in a variety of colours and mirror finishes. Available in sizes up to 2.4m x 3.1m per panel, any shape, with our without LED lights, and with apertures for wall lights, plugs, taps etc.

## Splashback Displays

The installation of a complete CMYK 4 colour Digital Glass Printer enables Aquavision to print absolutely anything onto a piece of glass. Solid colours, patterns, prints, or even photos, there are endless possibilities. All Aquavision displays are capable of withstanding the heat and day-to-day mess from the kitchen. Available in sizes up to 2.4m x 3.1m per panel, any shape, with our without LED lights, and with apertures for wall lights, plugs, taps etc.
