

WHAT'S YOUR COLOUR ?

Round sound

Our beautifully-designed spherical loudspeakers have long been the audiophile's choice in the 'compact' speaker category.

From our classic 4" Micro model - the original high-end small speaker, to the 5" A'Diva and high performance SE variants - these all-metal spheres are capable of producing a vast sound stage and pinpoint imaging, in a beautifully compact, visually attractive design.

GALLOACOUSTICS.COM

Add our ProfileSub and TR-3D subwoofers and an array of mounting options and it's easy to configure a system to fit your surroundings and audio aspirations, whether that be music, movies or multi-room audio.

Available in a choice of 11 stock colours, from subtle Urban Grey and vibrant Race Red, to the luxurious tones of our Gold and Bronze finishes.

For that special project, our SPECTRUM bespoke colour service opens up a world of possibilities from the Pantone and RAL colour systems.

Call us today to find out how Gallo Acoustics can benefit your next project.

DROP SOME BEATS

Music from above

Gallo Acoustics DROPLET pendant speakers are the antidote to bland, corporate, hanging and in-ceiling speakers, and the solution to the challenges of open architecture and high ceilings. They offer a welcome injection of personality and color for projects that demand real hi-fi quality in a design-focussed, decor-friendly form.

At home in a wide variety of environments including private residences, bars & restaurants, retail stores, malls and exhibition centres,

GALLOACOUSTICS.COM

DROPLET has the audio credentials to back up its obvious aesthetic charms. Based upon our acclaimed 4" and 5" Micro and A'Diva spherical loudspeakers, DROPLET has true hi-fi pedigree and unrivalled clarity and dispersion.

Available in a choice of 11 stock colours and 9 different cable finishes, DROPLET opens up a world of interior design opportunities.

And for that special project our SPECTRUM bespoke colour service can match any colour, whether from the Pantone or RAL colour systems or simply a swatch of wallpaper, and with a delivery time measured in days not weeks.

70V / 100V Line Option Available

AUDIOPHILE AUDIOVISUAL

Design-driven perfection

Strada 2 is the latest incarnation of our acclaimed Strada reference speaker, and our most ambitious project to date. Impressive power handling, 90dB sensitivity, 68Hz-20Khz frequency response and textbook perfect dispersion enable Strada 2 to shine in any room, and with any system.

A true hi-fi quality loudspeaker that's equally impressive on a wall or a floor stand, with music or a dynamic movie soundtrack.

GALLOACOUSTICS.COM

Enhanced by the inclusion of our proprietary OPT System and critically acclaimed CDT 2 tweeter (Cylindrical Diaphragm Transducer), Strada 2 blurs the line between recorded sound and live performance, always producing the most expansive and full bodied soundstage imaginable.

Strada 2 is available in a second model variant known as the Strada 2 Centre. This alternate version utilises a horizontal tweeter arrangement, allowing use as a center channel speaker in a surround sound setup.

Strada 2 is available in a choice of two colour finishes, black and stainless steel, or all black, and is ideally paired with the Gallo Acoustics ProfileSub or TR-3D subwoofers.

NATURAL HABITAT

The great outdoors

HABITAT is our first weatherproof range and introduces some much needed style to the somewhat utilitarian outdoor speaker category.

This IP66 rated outdoor range is derived from the timeless 4" and 5" spherical forms of our classic Micro & A'Diva speakers. Completely re-engineered from the inside out and featuring a custom 3" waterproof driver, all-stainless steel enclosure and neat perforated stainless grille.

GALLOACOUSTICS.COM

Both Micro & A'Diva Habitat variants have been developed to deliver the same acoustic qualities, performance and sound signature as their indoor equivalents, meaning there's no need to compromise when taking your soundtrack alfresco. And thanks to IP66-certified mechanical design, they're equally at home in the sunshine as they are in the driving rain or in sub-zero environments.

Micro & A'Diva Habitat speakers are available in a choice of satin black, matt white and brushed stainless steel, with optional weatherproof wall brackets to match.

For further information ask your retailer or visit www.galloacoustics.com

PROFILESUB

Keeping a low profile

Our ProfileSub on-wall subwoofer has been designed to compliment our entire range, from the classic 4" Micro through to the Strada 2 Reference speaker, equally at home with music or movie soundtracks.

ProfileSub provides powerful yet controlled bass extension in a discreet, design-conscious package. Hang ProfileSub on the wall in a horizontal or vertical orientation, or alternatively hide it from view under a piece of furniture such as a sofa.

By being wall-mounted, ProfileSub frees up floor space and isn't burdened by the performance constraints and wall vibration issues normally associated with in-wall subwoofers. ProfileSub has been engineered to acoustically decouple from the wall, ensuring that the only vibrations being created are good ones.

Featuring an 8" woofer and driven by a high performance 150 Watt Class-D amplifier, ProfileSub delivers bass frequencies down to 32Hz, developing excellent definition and deep, rich bass.

ProfileSub is available in satin white and satin black finishes, each supplied with two detachable grille options - black and cement-grey, providing an added element of visual customisation.

ROOMSUB

Bass for your space

The RoomSub range of subwoofers has been designed to compliment our entire* loudspeaker line-up, from the classic 4" Micro through to our Strada 2 and Droplet pendant range.

Developed to be equally comfortable with music or movie soundtracks, RoomSubs deliver powerful yet controlled bass from deceptively compact cabinets that exude quiet, considered minimalism.

PROFILE ON-WALL

A DISCREET PROFILE

PROFILE on-wall speakers combine uncompromising acoustic performance with a clean, understated contemporary design, delivered in a flexible, installation-friendly format.

Engineered to be as comfortable with music as they are with energetic multi-channel soundtracks for movies or

gaming, PROFILE speakers deliver an open, expansive sound field with impressively deep bass performance.

With six models in the line-up - from the 50W Profile1 to the 120W-rated Profile4 - there's a PROFILE speaker for every application, from a child's bedroom to a large-scale home cinema, making system building effortless.
